## REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

98-1148

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,277,085 B1, granted August 21, 2001, and for which a reissue patent is sought on the invention entitled SOLENOIDAL SKIN VIBRATOR ENERGIZED BY COMPLEX ELECTRIC WAVEFORMS

the specification of which

is attached hereto.

was filed on \_\_\_\_\_ as reissue application number \_\_\_\_\_ / \_\_\_\_\_ and was amended on \_\_\_\_\_  
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.

by reason of the patentee claiming more or less than he had the right to claim in the patent.

by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The patentee had a right to claim more than he claimed in the patent.

In prototyping the device shown and disclosed in the patent the patentee discovered an inertia effect that causes the tube and windings thereon to follow the complex electrical waveforms to a surprising degree. Therefore, new claim 12 has been added. Limitations to damping have not been included because damping appears not to be required with a sufficiently heavy permanent magnet relative to the tube and windings.

The original patent will be surrendered upon an indication from the examiner that the new claim is allowable.
